Window Cills and Skirting

“the texture, tone and finish of stone for so much less”

What is DecSTONE™?

DecSTONE™ is a natural mineral composite which emulates limestone with remarkable realism.

DecSTONE™ Window Board & Skirting has become the preferred option in conservatories.

DecSTONE™ perfectly harmonises any conservatory, complimenting the structural shape and clean lines, providing a surface of stone texture with practical durability. Whether installed with a stone, wooden or even carpet flooring DecSTONE™ sets a tone of understated luxury making it perfect for any installation. Whilst real limestone window cills and skirting would be an extravagant luxury typically costing excessive amounts, the same appearance can be achieved with DecSTONE™, costing a pleasantly affordable sum and bringing many practical advantages.

Products Available

The DecSTONE™ range is one of simple beauty, with elegantly proportioned bull-nosed window board and sculptured skirting board which suit any style of conservatory; traditional or contemporary.

“Durable, practical and looks absolutely stunning”

“It really seems to bring our conservatory to life with it's natural appearance”

DecSTONE™ may naturally mellow in periods of intense sunlight.

Why have DecSTONE™ ?

DecSTONE™ is now the window board of choice for discerning conservatory customers. It's qualities include:

- Remarkably Realistic
- Highly Practical
- Maintenance Free
- Quickly and Easily Installed
- Hand Made in England

The presence of DecSTONE™ will always bestow a lasting impression of space and grandeur to the eye and touch.

Durability

As well as being an attractive feature to enhance your conservatory, DecSTONE™ Cillstones and Skirting also have many practical advantages.

CLEANING - If required DecSTONE™ can be cleaned with most non-abrasive household cleaners.

WAX CRAYON - This can be easily removed with a cloth soaked in white spirit and a small brush.

STAIN RESISTANCE

- DecSTONE™ will resist spillages including Red Wine, Tea and Coffee and can be simply cleaned with hot soapy water. To maintain the high standard of finish and to avoid the risk of staining, we suggest that spillages are cleaned up quickly.

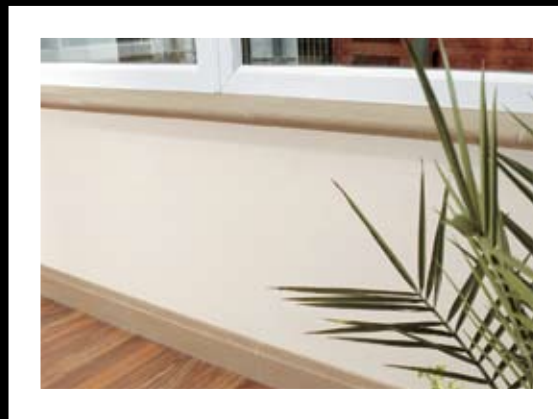

No Maintenance

DecSTONE™ can be very simply and quickly installed into your conservatory with minimal trouble. All that's required are basic carpentry tools and skills. This has made DecSTONE™ popular, not just in new-build conservatories, but also for anyone who wishes to upgrade their existing conservatory with a fresh look.

Not only is DecSTONE™ easy to install, but has no future maintenance to worry about. Whereas a wooden board requires regular painting or staining, DecSTONE™ is installed in its finished state which eliminates the need for any further finishing processes.

“All our friends think it's real stone - even when they get close”

*“So perfect that even experts have difficulty
telling stone from DecSTONE™”*
